The journal exists for the publication of experimental and theoretical investigations of combustion phenomena and closely allied matters. Among the subjects emphasized are: atmospheric pollution from combustion; combustion in practical systems; deflagration and detonation waves; electrical aspects of flames; experimental techniques; fire phenomena; flame ignition, inhibition, propagation, stability and structure; fluid dynamics and combustion; heat transfer and radiation; heterogeneous combustion; kinetics and mechanisms of combustion reactions; limits of flammability and of spontaneous ignition; modeling and scaling in combustion processes; new applications of combustion; propellants; sooting; spectra; supersonic reacting flow; thermal decomposition processes; thermochemistry and thermodynamics; transient species; transport properties and turbulence in flames. Critical reviews of current work will be invited. Relevant books will be reviewed. Announcements, Notices, and Reports of Combustion Institute meetings will be published whenever possible.

COMBUSTION AND FLAME

THE JOURNAL OF THE COMBUSTION INSTITUTE

VOLUME 26, JANUARY-JUNE 1976

Contents

J. H. AY *and* M. SICHEL (Ann Arbor, Michigan)
Theoretical Analysis of NO Formation
Near The Primary Reaction Zone in Methane Combustion 1

C. K. LAW (Princeton, New Jersey)
Unsteady Droplet Conbustion with Droplet Heating 17

SHIVADEV K. UBHAYAKAR (San Diego, California)
Burning Characteristics of a Spherical Particle Reacting
with Ambient Oxidizing Gas at its Surface 23

F. S. GONZALEZ *and* S. SANDLER (Toronto, Canada)
An Experimental Study of the Oxidation of *n*-Pentane
in the High Temperature Pre-ignition Region 35

CLIFFORD M. DETZ (Tarrytown, New York)
Threshold Conditions for the Ignition
of Acetylene Gas by a Heated Wire 45

JOAN C. BIORDI, CHARLES P. LAZZARA *and* JOHN F. PAPP
(Pittsburgh, Pennsylvania)
Molecular Beam Mass Spectrometry Applied to Determining
The Kinetics of Reactions In Flames
II. A Critique of Rate Coefficient Determinations 57

B. J. McCAFFREY *and* A. L. BERLAD (Stony Brook, New York)
Some Observations on the Oscillatory Behavior
of Carbon Monoxide Oxidation 77

A. TEWARSON *and* R. F. PION (Norwood, Massachusetts)
Flammability of Plastics–I. Burning Intensity 85

A. D. GOOLSBY (Houston, Texas) *and* W. W. HASKELL (Wood River, Illinois)
Flame-Quench Distance Measurements in a CFR Engine 105

R. W. BILGER (Sydney, Australia)
Reaction Zone Thickness and Formation of Nitric Oxide
In Turbulent Diffusion Flames 115

Brief Communications

B. J. McCAFFREY *and* G. HESKESTAD (Washington, D.C.)
A Robust Bidirectional Low-Velocity Probe
for Flame and Fire Application 125

ALEXANDER VRANOS *and* EDWARD D. TABACK (East Hartford, Connecticut)
Combustion Product Distributions in the Primary Zone
of a Gas Turbine Combustor 129

C. R. KRISHNA (Upton, New York) *and* A. L. BERLAD (Stony Brook, New York)
Stability of Combustible Systems 133

Book Review 137

Meeting Announcements 139

DAVID I. ORLOFF (Columbia, South Carolina) *and* RICHARD A. MATULA (Philadelphia, Pennsylvania)
An Experimental Study of the Afterburning Region of Lean Tetrafluoroethylene-Oxygen Flame 141
J. BUCKMASTER (Urbana, Illinois)
The Quenching of Deflagration Waves 151
TAKASHI KASHIWAGI *and* DAVID L. NEWMAN (Washington, D.C.)
Flame Spread Over an Inclined Thin Fuel Surface 163
PAAVO SEPRI (La Jolla, California)
Analysis of the Pressure and Velocity Fields Across Steady Diffusion Flame Sheets 179
TOSHISUKE HIRANO, KENJI SATO *and* KOICHI TAZAWA (Ibaraki, Japan)
Instability of Downward Flame Spread over Paper in an Air Stream 191
DEREK BRADLEY *and* ALAN MITCHESON (Leeds, U.K.)
Mathematical Solutions for Explosions in Spherical Vessels 201
C. K. LAW (Princeton, New Jersey)
Multicomponent Droplet Combustion with Rapid Internal Mixing 219
N. N. BAKHMAN, YU S. KICHIN, S. M. KOLYASOV *and* A. E. FOGELZANG (Moscow, U.S.S.R.)
Investigation of the Thermal Structure of the Burning Zone in Condensed Mixtures by Fine Thermocouples 235
C. P. FENIMORE (Schenectady, New York)
Reactions of Fuel-Nitrogen in Rich Flame Gases 249
ALFRED E. FREY, JR. *and* JAMES S. T'IEN (Cleveland, Ohio)
Near-Limit Flame Spread Over Paper Samples 257
Comments
F. A. WILLIAMS (San Diego, La Jolla, California)
Criteria for Existence of Wrinkled Laminar Flame Structure of Turbulent Premixed Flames 269
G. E. ANDREWS, DEREK BRADLEY, *and* S. B. LWAKABAMBA (Leeds, U.K.)
Response to Comment of Forman A. Williams 271

Meeting Reports 273

Meeting Announcement 279

Obituary: John Wilfrid Linnett, F.R.S. 281

HIROSHI TSUJI *and* KIYOSHI MATSUI (Tokyo, Japan)
An Aerothermochemical Analysis of Combustion in the Stagnation Flow 283
G. A. LUCKETT *and* B. MILE (Chester, England)
The Formation of Methanol During the Gas-Phase Oxidation of Methane 299
K. V. L. RAO *and* A. H. LEFEBVRE (Bedford, England)
Evaporation Characteristics of Kerosine Sprays Injected into a Flowing Air Stream 303
R. J. HARRIS, W. HORNE *and* A. WILLIAMS (Leeds, England)
High Intensity Oxy-Methane Combustion in a Jet-Mixing Burner 311
L. DOUGLAS SMOOT, WILLIAM C. HECKER *and* GERALD A. WILLIAMS (Provo, UT)
Prediction of Propagating Methane-Air Flames 323
A. M. GARFORTH (Johannesburg, South Africa)
Unburnt Gas Density Measurement in a Spherical Combustion Bomb by Infinite-Fringe Laser Interferometry 343
K. W. CHIU *and* J. H. LEE (Montreal, Canada)
A Simplified Version of the Barthel Model for Transverse Wave Spacings in Gaseous Detonation 353
L. KRISHNAMURTHY, F. A. WILLIAMS *and* K. SESHADRI (La Jolla, CA)
Asymptotic Theory of Diffusion-Flame Extinction in the Stagnation-Point Boundary Layer 363
L. F. PHILLIPS (Oxford, England)
Numerical Study of the Breakdown of Cyanogen in an $H_2/N_2/O_2$ Flame 379
J. F. GRIFFITHS, M. F. GILLIGAN *and* P. GRAY (Leeds, England)
Pyrolysis of Isopropyl Nitrate—II. Decomposition at High Temperatures and Pressures 385
E. R. MILLER, R. N. NEWMAN *and* F. M. PAGE (Birmingham, England)
Ionisation Associated with Solid Particles in Flames—III. Probe Studies 395
Brief Communications

COMBUSTION AND FLAME

THE JOURNAL OF THE COMBUSTION INSTITUTE

VOLUME 27, AUGUST–DECEMBER 1976

Contents

K.V.L. RAO (Bangalore, India) *and* A.H. LEFEBVRE (Cranfield, Bedford, U.K.)
Minimum Ignition Energies in Flowing Kerosine-Air Mixtures 1

R.J. BOWSER *and* F.J. WEINBERG (London, U.K.)
Chemi-ionisation during Pyrolysis 21

R.M. FRISTROM, C. GRUNFELDER *and* L.W. HUNTER (Laurel, MD)
Exploratory Studies in Polymer Ablation, Ignition and Extinction by the Moving Wire Technique 33

G.H. MARKSTEIN (Norwood, MA)
Radiative Energy Transfer from Turbulent Diffusion Flames 51

N. ISHIKAWA *and* M.C. BRANCH (Berkeley, CA)
An Experimental Determination of the Quenching Distance of Methanol and Iso-octane/Methanol Blends 65

H. F. NELSON (Rolla, MO) *and* RAYMOND KUSHIDA (Pasadena, CA)
Flame Stability in Combusting Turbulent Jets 73

MICHIKATA KONO, SEIICHIRO KUMAGAI *and* TADAMI SAKAI (Tokyo, Japan)
Ignition of Gases by Two Successive Sparks with Reference to Frequency Effect of Capacitance Sparks 85

MILTON FARBER *and* R.D. SRIVASTAVA (Monrovia, CA)
Thermochemical Reactions of Aluminum and Fluorine in Hydrogen-Oxygen Flames 99

R. RAVI KUMAR (Trivandrum, India) *and* K.A. BHASKARAN (Madras, India)
Shock Tube Study of the Effect of Unsymmetric Dimethyl Hydrazine on the Ignition Delay of Methane-Oxygen-Argon Mixtures 107

CHIH MING HO, KARL JAKUS *and* KIM H. PARKER (Amherst, MA)
Temperature Fluctuations in a Turbulent Flame 113

Brief Communications

L.A. LOVACHEV (Moscow, USSR)
On Flame Propagation in Vortices 125

ROLF K. ECKHOFF *and* GISLE ENSTAD (Bergen, Norway)
Why Are "Long" Electric Sparks More Effective Dust Explosion Initiators Than "Short" Ones? 129

W. STRICKER (Stuttgart, West Germany)
Local Temperature Measurements in flames by Laser Raman Spectroscopy 133

Book Review 137

Books Received 139

Meeting Announcements 141

D. G. JONES and J. C. MACKIE (Southampton, U.K.)
Evaluation of C_2 Resonance Fluorescence as a
Technique for Transient Flame Studies 143
R. R. BAKER, R. R. BALDWIN and R. W. WALKER (North Humberside, U.K.)
Addition of Neopentane to Slowly Reacting Mixtures
of $H_2 + O_2$ at 480 °C. Part II. The Addition of the
Primary Products from Neopentane, and the Rate
Constants for H and OH Attack on Neopentane 147
G. KLINGENBERG (Weil am Rhein, Germany) and H. MACH (St. Louis, France)
Investigation of Combustion Phenomena
Associated with the Flow of Hot Propellant Gases–I:
Spectroscopic Temperature Measurements Inside the
Muzzle Flash of a Rifle 163
G. KLINGENBERG and G. A. SCHRÖDER (Weil, Germany)
Investigation of Combustion Phenomena Associated
with the Flow of Hot Propellant Gases–II:
Gas Velocity Measurements by Laser-Induced Gas Breakdown 177
C. MORLEY (Chester, U.K.)
The Formation and Destruction of Hydrogen
Cyanide from Atmospheric and Fuel Nitrogen in
Rich Atmospheric-Pressure Flames 189
K. MÜLLER-DETHLEFS and A. F. SCHLADER (Göttingen, West Germany)
The Effect of Steam on Flame Temperature,
Burning Velocity and Carbon Formation in
Hydrocarbon Flames 205
H. MATSUI and J. H. LEE (Montreal, Canada)
Influence of Electrode Geometry and Spacing
on the Critical Energy for Direct Initiation
of Spherical Gaseous Detonations 217
R. KNYSTAUTAS and J. H. LEE (Montreal, Canada)
On the Effective Energy for Direct Initiation
of Gaseous Detonations 221
D. R. HARDESTY (Albuquerque, NM)
An Investigation of the Shock Initiation
of Liquid Nitromethane 229
K. ANNAMALAI and P. DURBETAKI (Atlanta, GA)
Ignition of Thermally Thin Porous Pyrolyzing
Solids Under Normally Impinging Flames. 253
MICHAEL A. DELICHATSIOS (Norwood, MA)
Fire Growth Rates in Wood Cribs 267

Brief Communication

G. A. KARIM and O. BADR (Calgary, Canada)
Use of Fiber Optics to Determine
Flame Propagation Rates in Long Tubes and Ducts 279

Meeting Report 281

Book Review 283

Meeting Announcements. 284

I. NEMES, É. DANÓCZY, T. VIDÓCZY, and D. GÁL (Budapest, Hungary)
A New Method for Determination
of Reactivity Ratios in Hydrocarbon Oxidation Processes 285
K. C. PATIL, V. R. PAI VERNEKER, and S. R. JAIN (Bangalore, India)
The Role of Lithium and Magnesium Perchlorate
Ammines in Ammonium Perchlorate Decomposition 295
S. B. POPE (London, U.K.)
The Probability Approach
to the Modelling of Turbulent Reacting Flows 299
R. W. PITZ, R. CATTOLICA, F. ROBBEN, and L. TALBOT (Berkeley, CA)
Temperature and Density in a Hydrogen-Air Flame from Rayleigh Scattering 313
W. B. BUSH and F. A. WILLIAMS (La Jolla, CA)
Influence of Strong Conductive
Gas-Phase Cooling on Radiant Ignition of a Reactive Solid 321
JOHN H. LEE and K. RAMAMURTHI (Montreal, Canada)
On the Concept of the Critical Size of a Detonation Kernel 331
C. M. GUIRAO, G. G. BACH, and JOHN H. LEE (Montreal, Canada)
Pressure Waves Generated by Spherical Flames 341
DEREK BRADLEY and SAID M. A. IBRAHIM (Leeds, U.K.)
Electron-Gas Energy Exchanges
in a.c. Fields and Their Relevance in Lasers 353
P. G. FELTON, B. F. GRAY, and N. SHANK (Leeds, England)
Low Temperature Oxidation in a
Stirred Flow Reactor—II. Acetaldehyde (Theory) 363
A. GRILLO and M. W. SLACK (Bethpage, NY)
Shock Tube Study of Ignition Delay Times
in Methane-Oxygen-Nitrogen-Argon Mixtures 377
D. GOLOMB and J. H. BROWN (Hanscom AFB, MA)
Chemiluminescence of Trimethyl
Aluminum in Active Oxygen and Nitrogen 383

Brief Communications

SUBJECT INDEX

Volumes 26–27, 1976

1. ANALYTICAL MODELING OF COMBUSTION SYSTEMS

Ignition of Thermally Thin Porous Pyrolyzing Solids Under Normally Impinging Flames, **27**, 253

Theoretical Analysis of NO Formation Near the Primary Reaction Zone in Methane Combustion, **26**, 1

Electron-Gas Energy Exchanges in a.c. Fields and Their Relevance in Lasers, **27**, 353

Mathematical Solutions for Explosions in Spherical Vessels, **26**, 201

The Quenching of Deflagration Waves, **26**, 151

Influence of Strong Conductive Gas-Phase Cooling on Radiant Ignition of Reactive Solid, **27**, 321

Low Temperature Oxidation in a Stirred Flow Reactor–II. Acetaldeyhde, **27**, 363

Pressure Waves Generated by Spherical Flames, **27**, 341

Stability of Combustible System, **26**, 133

Asymptotic Theory of Diffusion-Flame Extinction in the Stagnation-Point Boundary Layer, **26**, 363

Multicomponent Droplet Combustion with Rapid Internal Mixing, **26**, 219

Unsteady Droplet Combustion with Droplet Heating, **26**, 17

Flame Stability in Combusting Turbulent Jets, **27**, 73

Numerical Study of the Breakdown of Cyanogen in an $H_2/N_2/O_2$ Flame, **26**, 379

Analysis of the Pressure and Velocity Fields Across Steady Diffusion Flame Sheets, **26**, 179

Prediction of Propagating Methane-Air Flames, **26**, 323

An Aerothermochemical Analysis of Combustion in the Stagnation Flow, **26**, 283

Burning Characteristics of a Spherical Particle Reacting with Ambient Oxidizing Gas at its Surface, **26**, 23

2. ATMOSPHERIC POLLUTION FROM COMBUSTION

Theoretical Analysis of NO Formation Near the Primary Reaction Zone in Methane Combustion, **26**, 1

Reaction Zone Thickness and Formation of Nitric Oxide in Turbulent Duffusion Flames, **26**, 115

Reactions of Fuel-Nitrogen in Rich Flame Gases, **26**, 249

The Formation and Destruction of Hydrogen Cyanide from Atomspheric and Fuel Nitrogen in Rich Atmospheric-Pressure Flames, **27**, 189

3. BURNING OF LIQUIDS

Multicomponent Droplet Combustion with Rapid Internal Mixing, **26**, 219

Unsteady Droplet Combustion with Droplet Heating, **26**, 17

Analysis of the Pressure and Velocity Fields Across Steady Diffusion Flame Sheets, **26**, 179

4. BURNING OF SOLIDS

Influence of Strong Conductive Gas-Phase Cooling on Radiant Ignition of Reactive Solid, **27**, 321

Fire Growth Rates in Wood Cribs, **27**, 267

Near-Limit Flame Spread Over Paper Samples, **26**, 257

Exploratory Studies in Polymer Ablation, Ignition and Extinction by the Moving Wire Technique, **27**, 33
Instability of Downward Flame Spread over Paper in an Air Stream, **26**, 191
Flame Spread Over an Inclined Thin Fuel Surface, **26**, 163
Flammability of Plastics–I. Burning Intensity, **26**, 85
An Aerothermochemical Analysis of Combustion in the Stagnation Flow, **26**, 283
Burning Characteristics of a Spherical Particle Reacting with Ambient Oxidizing Gas at its Surface, **26**, 23

5. COMBUSTION IN PRACTICAL SYSTEMS
Flame-Quench Distance Measurements in a CFR Engine, **26**, 105
High Intensity Oxy-Methane Combustion in a Jet-Mixing Burner, **26**, 311
An Experimental Determination of the Quenching Distance of Methanol and Isooctane/Methanol Blends, **27**, 65
Evaporation Characteristics of Kerosine Sprays Injected into a Flowing Air Stream, **26**, 303
Minimum Ignition Energies in Flowing Kerosine-Air Mixtures, **27**, 1
Combustion Product Distributions in the Primary Zone of a Gas Turbine Combustor, **26**, 129

6. DETONATION WAVES
A Simplified Version of the Barthel Model for Transverse Wave Spacings in Gaseous Detonation, **26**, 353
On the Effective Energy for Direct Initiation of Gaseous Detonations, **27**, 221
On the Concept of the Critical Size of a Detonation Kernel, **27**, 331
Influence of Electrode Geometry and Spacing on the Critical Energy for Direct Initiation of Spherical Gaseous Detonations, **27**, 217
Quenching Thickness for Detonations, **26**, 403

7. DIFFUSION FLAMES
Reaction Zone Thickness and Formation of Nitric Oxide in Turbulent Diffusion Flames, **26**, 115
Asymptotic Theory of Diffusion-Flame Extinction in the Stagnation-Point Boundary Layer, **26**, 363
Radiative Energy Transfer from Turbulent Diffusion Flames, **27**, 51
Flame Stability in Combusting Turbulent Jets, **27**, 73

8. ELECTRICAL ASPECTS OF FLAMES
Chemi-ionisation During Pyrolysis **27**, 21
Electron-Gas Energy Exchanges in a.c. Fields and Their Relevance in Lasers, **27**, 353
Ionisation Associated with Solid Particles in Flames–III. Probe Studies **26**, 395

9. EXPERIMENTAL TECHNIQUES
Investigation of the Thermal Structure of the Burning Zone in Condensed Mixtures by Fine Thermocouples, **26**, 235
Molecular Beam Mass Spectrometry Applied to Determining the Kinetics of Reactions in Flames–II. A Critique of Rate Coefficient Determinations, **26**, 57
Threshold Conditions for the Ignition of Acetylene Gas by a Heated Wire, **26**, 45
Exploratory Studies in Polymer Ablation, Ignition, and Extinction by the Moving Wire Technique, **27**, 33
Unburnt Gas Density Measurement in a Spherical Combustion Bomb by Infinite-Fringe Laser Interferometry, **26**, 343
Flame-Quench Distance Measurements in a CFR Engine, **26**, 105
Temperature Fluctuations in a Turbulent Flame, **27**, 113
An Experimental Determination of the Quenching Distance of Methanol and Isooctane/Methanol Blends, **27**, 65
Evaluation of C_2 Resonance Fluorescence as a Technique for Transient Flame Studies, **27**, 143
Use of Fiber Optics to Determine Flame Propagation Rates in Long Tubes and Ducts, **27**, 279
Ignition of Gases by Two Successive Sparks with Reference to Frequency Effect of Capacitance Sparks, **27**, 85
Influence of Electrode Geometry and Spacing on

the Critical Energy for Direct of Initiation Spherical Gaseous Detonations, **27**, 217
Some Observations on the Oscillatory Behavior of Carbon Monoxide Oxidation, **26**, 77
A Robust Bidirectional Low-Velocity Probe for Flame and Fire Application, **26**, 125
Ionisation Associated with Solid Particles in Flames—III. Probe Studies, **26**, 395
The Formation and Destruction of Hydrogen Cyanide from Atmospheric and Fuel Nitrogen in Rich Atmospheric-Pressure Flames, **27**, 189
A Shadowgraphic Investigation of High Pressure Droplet Vaporization, **26**, 407
Temperature and Density in a Hydrogen-Air Flame from Rayleigh Scattering, **27**, 313
Evaporation Characteristics of Kerosine Sprays Injected into a Flowing Air Stream, **26**, 303
Local Temperature Measurements in Flames by Laser Raman Spectroscopy, **27**, 133
Flammability of Plastics—I. Burning Intensity, **26**, 85
Holographic Size Analysis of Burning Sprays, **27**, 395

10. EXPLOSIVES AND PYROTECHNICS
An Investigation of the Shock Initiation of Liquid Nitromethane, **27**, 229

11. FIRE PHENOMENA
Ignition of Thermally Thin Porous Pyrolyzing Solids Under Normally Impinging Flames, **27**, 253
Fire Growth Rates in Wood Cribs, **27**, 267
Near-Limit Flame Spread Over Paper Samples, **26**, 257
Exploratory Studies in Polymer Ablation, Ignition and Extinction by the Moving Wire Technique, **27**, 33
Instability of Downward Flame Spread Over Paper in an Air Stream, **26**, 191
Flame Spread Over an Inclined Thin Fuel Surface, **26**, 163
A Robust Bidirectional Low-Velocity Probe for Flame and Fire Application, **26**, 125
A Flame Extinction Criterion for Fire Spread, **26**, 411
Flammability of Plastics—I. Burning Intensity, **26**, 85

12. FLAME IGNITION AND PROPAGATION
Ignition of Thermally Thin Porous Pyrolyzing Solids Under Normally Impinging Flames, **27**, 253
Mathematical Solutions for Explosions in Spherical Vessels, **26**, 201
Influence of Strong Conductive Gas-Phase Cooling on Radiant Ignition of Reactive Solid, **27**, 321
Threshold Conditions for the Ignition of Acetylene Gas by a Heated Wire, **26**, 45
Why are "Long" Electric Sparks More Effective Dust Explosion Initiators than "Short" Ones?, **27**, 129
Near-Limit Flame Spread Over Paper Samples, **26**, 257
Shock Tube Study of Ignition Delay Times in Methane-Oxygen-Nitrogen-Argon Mixtures, **27**, 377
An Investigation of the Shock Initiation of Liquid Nitromethane, **27**, 229
Flame Spread Over an Inclined Thin Fuel Surface, **26**, 163
Ignition of Gases by Two Successive Sparks with Reference to Frequency Effect of Capacitance Sparks, **27**, 85
On the Effective Energy for Direct Initiation of Gaseous Detonations, **27**, 221
Shock Tube Study of the Effect of Unsymmetric Dimethyl Hydrazine on the Ignition Delay of Methane-Oxygen-Argon Mixtures, **27**, 107
On the Concept of the Critical Size of a Detonation Kernel, **27**, 331
Influence of Electrode Geometry and Spacing on the Critical Energy for Direct Initiation of Spherical Gaseous Detonations, **27**, 217
Minimum Ignition Energies in Flowing Kerosine-Air Mixtures, **27**, 1
Prediction of Propagating Methane-Air Flames, **26**, 323

13. FLAME INHIBITION, QUENCHING AND EXTINCTION
The Quenching of Deflagration Waves, **26**, 151
Near-Limit Flame Spread Over Paper Samples, **26**, 257

Flame-Quench Distance Measurements in a CFR Engine, **26**, 105
An Experimental Determination of the Quenching Distance of Methanol and Isooctane/Methanol Blends, **27**, 65
A Flame Extinction Criterion for Fire Spread, **26**, 411
Quenching Thickness for Detonations, **26**, 403

14. FLAME RADIATION, SPECTRA AND EXCITED SPECIES
Electron-Gas Energy Exchanges in a.c. Fields and Their Relevance in Lasers, **27**, 353
Chemiluminescence of Trimethyl Aluminum in Active Oxygen and Nitrogen, **27**, 383
Flame Spread Over an Inclined Thin Fuel Surface, **26**, 163
Investigation of Combustion Phenomena Associated with the Flow of Hot Propellant Gases–I: Spectroscopic Temperature Measurements Inside the Muzzle Flash of a Rifle, **27**, 163
Radiative Energy Transfer from Turbulent Diffussion Flames, **27**, 51

15. FLAME STABILITY
Instability of Downward Flame Spread over Paper in an Air Stream, **26**, 191
Some Observations on the Oscillatory Behavior of Carbon Monoxide Oxidation, **26**, 77
Flame Stability in Combusting Turbulent Jets, **27**, 73

16. FLAME STRUCTURE AND TEMPERATURE
Investigation of the Thermal Structure of the Burning Zone in Condensed Mixtures of Fine Thermocouples, **26**, 235
Molecular Beam Mass Spectrometry Applied to Determining the Kinetics of Reactions in Flames–II. A Critique of Rate Coefficient Determinations, **26**, 57
Evaluation of C_2 Resonance Fluorescence as a Technique for Transient Flame Studies, **27**, 143
The Effect of Steam on Flame Temperature, Burning Velocity and Carbon Formation in Hydrocarbon Flames, **27**, 205
An Experimental Study of the Afterburning Region of Lean Tetrafluorethylene-Oxygen Flame, **26**, 141
Temperature and Density in a Hydrogen-Air Flame From Rayleigh Scattering, **27**, 313
Prediction of Propagating Methane-Air Flames, **26**, 323
Local Temperature Measurements in Flames by Laser Raman Spectroscopy, **27**, 133

17. FLUID DYNAMICS IN COMBUSTION
Pressure Waves Generated by Spherical Flames, **27**, 341
High Intensity Oxy-Methane Combustion in a Jet-Mixing Burner, **26**, 311
Investigation of Combustion Phenomena Associated with the Flow of Hot Propellant Gases–II: Gas Velocity Measurements by Laser-Induced Gas Breakdown, **27**, 177
On Flame Propagation in Vortices, **27**, 125
The Probability Approach to the Modelling of Turbulent Reacting Flows, **27**, 299

18. HETEROGENEOUS COMBUSTION
Asymptotic Theory of Diffusion-Flame Extinction in the Stagnation-Point Boundary Layer, **26**, 363
A Recirculating Fluidized Bed Combustor for Extended Flow Ranges, **27**, 391
An Aerothermochemical Analysis of Combustion in the Stagnation Flow, **26**, 283

19. KINETICS AND MECHANISMS OF COMBUSTION REACTIONS
Addition of Neopentane to Slowly Reacting Mixtures of $H_2 + O_2$ at 480°C. Part II. The Addition of the Primary Products from Neopentane, and the Rate Constants for H and OH Attack on Neopentane, **27**, 147
Molecular Beam Mass Spectrometry Applied to Determining the Kinetics of Reactions in Flames–II. A Critique of Rate Coefficient Determinations, **26**, 57
Reactions of Fuel-Nitrogen in Rich Flame Gases, **26**, 249
Chemiluminescence of Trimethyl Aluminum in Active Oxygen and Nitrogen, **27**, 383

An Experimental Study of the Oxidation of n-Pentane in the High Temperature Pre-ignition Region, **26**, 35
The Formation and Destruction of Hydrogen Cyanide from Atmospheric and Fuel Nitrogen in Rich Atmospheric-Pressure Flames, **27**, 189
A New Method for Determination of Reactivity Ratios in Hydrocarbon Oxidation Processes, **27**, 285
An Experimental Study of the Afterburning Region of Lean Tetrafluoroethylene-Oxygen Flame, **26**, 141
The Role of Lithium and Magnesium Perchlorate Ammines in Ammonium Perchlorate Decomposition, **27**, 295
Numerical Study of the Breakdown of Cyanogen in an $H_2/N_2/O_2$ Flame, **26**, 379

20. LOW TEMPERATURE OXIDATION
Addition of Neopentane to Slowly Reacting Mixtures of $H_2 + O_2$ at 480°C. Part II. The Addition of the Primary Products from Neopentane, and the Rate Constants for H and OH Attack on Neopentane, **27**, 147
Autoignition and Cool-Flame Behaviour in a Convective System, **27**, 399
Low Temperature Oxidation in a Stirred Flow Reactor–II. Acetaldehyde, **27**, 363
An Experimental Study of the Oxidation of n-Pentane in the High Temperature Pre-ignition Region, **26**, 35
The Formation of Methanol During the Gas-phase Oxidation of Methane, **26**, 299
A New Method for Determination of Reactivity Ratios in Hydrocarbon Oxidation Processes, **27**, 285

21. MODELING AND SCALING IN COMBUSTION PROCESSES
Response to Comment of Forman A. Williams,, **26**, 271
Reaction Zone Thickness and Formation of Nitric Oxide in Turbulent Diffusion Flames, **26**, 115
A Simplified Version of the Barthel Model for Transverse Wave Spacings in Gaseous Detonation, **26**, 353
Fire Growth Rates in Wood Cribs, **27**, 267
Comment on: A Modification of the Composite Propellant Erosive Burning Model of Lenoir and Robillard, **27**, 405
Flame Spread Over an Inclined Thin Fuel Surface **26**, 163
Reply to Comment of R. L. Glick, **27**, 407
On the Concept of the Critical Size of a Detonation Kernel, **27**, 331
Radiative Energy Transfer from Turbulent Diffusion Flames, **27**, 51
The Probability Approach to the Modelling of Turbulent Reacting Flows, **27**, 299
Criteria for Existence of Wrinkled Laminar Flame Structure of Turbulent Premixed Flames, **26**, 269
Quenching Thickness for Detonations, **26**, 403

22. NEW COMBUSTION SYSTEMS, NEW APPLICATIONS
A Recirculating Fluidized Bed Combustor for Extended Flow Ranges, **27**, 391

23. PARTICLES AND DROPLETS
Why are "Long" Electric Sparks More Effective Dust Explosion Initiators than "Short" Ones?, **27**, 129
Multicomponent Droplet Combustion with Rapid Internal Mixing, **26**, 219
Unsteady Droplet Combustion with Droplet Heating, **26**, 17
Ionisation Associated with Solid Particles in Flames–III. Probe Studies, **26**, 395
A Shadowgraphic Investigation of High Pressure Droplet Vaporization, **26**, 407
Evaporation Characteristics of Kerosine Sprays Injected into a Flowing Air Stream, **26**, 303
Minimum Ignition Energies in Flowing Kerosine-Air Mixtures, **27**, 1
Analysis of the Pressure and Velocity Fields Across Steady Diffusion Flame Sheets, **26**, 179
Burning Characteristics of a Spherical Particle Reacting with Ambient Oxidizing Gas at its Surface, **26**, 23
Holographic Size Analysis of Burning Sprays, **27**, 395

24. PROPELLANTS
Investigation of the Thermal Structure of the Burning Zone in Condensed Mixtures by Fine Thermocouples, **26**, 235
Comment on: A Modification of the Composite Propellant Erosive Burning Model of Lenoir and Robillard, **27**, 405
Pyrolysis of Isopropyl Nitrate—II. Decomposition at High Temperatures and Pressures, **26**, 385
Reply to comment of R. L. Glick, **27**, 407
Investigation of Combustion Phenomena Associated with the Flow of Hot Propellant Gases—I. Spectroscopic Temperature Measurements Inside the Muzzle Flash of a Rifle, **27**, 163
Investigation of Combustion Phenomena Associated with the Flow of Hot Propellant Gases—II. Gas Velocity Measurement by Laser-Induced Gas Breakdown, **27**, 177
The Role of Lithium and Magnesium Perchlorate Ammines in Ammonium Perchlorate Decomposition, **27**, 295

25. SOOTING
Chemi-ionisation During Pyrolysis, **27**, 21
The Effect of Steam on Flame Temperature, Burning Velocity and Carbon Formation in Hydrocarbon Flames, **27**, 205

26. SPONTANEOUS IGNITION AND COMBUSTION IN VESSELS
Autoignition and Cool-Flame Behaviour in a Convective System, **27**, 399
Unburnt Gas Density Measurement in a Spherical Combustion Bomb by Infinite-Fringe Laser Interferometry **26**, 343
Stability of Combustible System, **26**, 133
Some Observations on the Oscillatory Behavior of Carbon Monoxide Oxidation, **26**, 77

27. SUPERSONIC REACTING FLOW
Chemi-ionisation During Pyrolysis, **27**, 21
Shock Tube Study of Ignition Delay Times in Methane-Oxygen-Nitrogen-Argon mixtures, **27**, 377
Shock Tube Study of the Effect of Unsymmetric Dimethyl Hydrazine on the Ignition Delay of Methane-Oxygen-Argon Mixtures, **27**, 107

28. THERMAL DECOMPOSITION PROCESSES
Threshold Conditions for the Ignition of Acetylene Gas by a Heated Wire, **26**, 45
Pyrolysis of Isopropyl Nitrate—II. Decomposition at High Temperatures and Pressures, **26**, 385

29. THERMOCHEMISTRY AND THERMODYNAMICS
Thermochemical Reactions of Aluminum and Fluorine in Hydrogen-Oxygen Flames, **27**, 99

30. TURBULENCE IN FLAMES
Response to Comment of Forman A. Williams, **26**, 271
Reaction Zone Thickness and Formation of Nitric Oxide in Turbulent Diffusion Flames, **26**, 115
High Intensity Oxy-Methane Combustion in a Jet-Mixing Burner, **26**, 311
Temperature Fluctuations in a Turbulent Flame, **27**, 113
Radiative Energy Transfer from Turbulent Diffusion Flames, **27**, 51
Flame Stability in Combusting Turbulent Jets, **27**, 73
The Probability Approach to the Modelling of Turbulent Reacting Flows, **27**, 299
Criteria for Existence of Wrinkled Laminar Flame Structure of Turbulent Premixed Flames, **26**, 269
